

EXTERNAL WAREHOUSE FOR A RENOWNED CAR MANUFACTURER

Precisely timed deliveries to the assembly line is paramount in automotive logistics. At the external warehouse in Hamburg, STUTE consolidates deliveries from around 300 suppliers and ensures JIT supply to the component production line of a renowned car manufacturer.

CUSTOMER REQUIREMENT

- Management of the external warehouse for production supply (planning, realisation, operation)
- Consolidation of deliveries from different suppliers
- Handling of approx. 2,500 different articles
- Additional storage of production surpluses, empties and machine spare parts
- Empties handling for suppliers and production
- Inventory monitoring and tracking to ensure parts availability

SOLUTION

- 25,000 m² storage space (open 24/6)
- Conceptual planning and operation of the external warehouse
- On-demand JIT deliveries to production by means of FTL round trips (two-hourly cycle and 60-minute express deliveries after call-up)
- Empties and spare parts management
- Booking of direct deliveries in the customer system
- Customs clearance of inbound consignments

ADDED VALUE

- Securing production supply
- Reduction of
 - transport costs
 - storage space requirements at the plant
 - administrative costs
- Enhanced quality and performance
