

## STUTE STAHLSERVICE GMBH

Coil logistics is a demanding service that covers the entire product spectrum of unpickled and pickled hot-rolled wide strip, as well as cold-rolled and galvanised coil material. At ArcelorMittal Bremen GmbH's premises, Stute Stahlservice GmbH is responsible for logistics handling. This includes storage, end customer-specific packaging and shipping of the steel coils.

### CUSTOMER REQUIREMENT

- End-to-end logistics concept for handling steel coils
- Process optimisation
- Enhanced quality
- Increased productivity
- Creating a uniform data basis
- Ensuring process transparency

### SOLUTION

- Assumption of process steps not explicitly part of steel production
- Personnel secondment
- System analysis
- Staff qualification and greater staff flexibility
- Developing a uniform system for production data collection and planning

### ADDED VALUE

- Concentration on actual production flows
- Greater flexibility in responding to production fluctuations
- Cost reductions through increased productivity
- Individual optimisation of the various logistics flows
- Staff development
